

To whom it may concern,

I am to the point that I am tired of politicians. You all have nothing better to do then to go after satellite radio because they offer instant weather and traffic and other services to paying customers. We are paying for XM radio. I am strongly telling you to not pass HR 4026. You all need to worry about other issues like the War in Iraq and ways to help the economy. If the NAB doesn't like the competition to bad. Tell them to either find a way to improve their systems or tough. This country is about competition. I pay for XM radio and have a right to get instant traffic and weather. I like that they provide this service. I decided to pay for XM radio because I got tired of all the commercials that are played on regular radio. So to have to deal with you all trying to take away more of my rights as a paying consumer is ridiculous. You all need to get a life.
